Commonwealth Named Top 10 U.S. Electrical Design Firm

JACKSON, MI – Commonwealth Associates, Inc. is pleased to announce that it has moved up one spot in *EC&M Magazine's* Top 10 Electrical Design Firms ranking, to 7th in the nation. The Top 10 gallery profile complements the magazine's broader annual Top 40 industry ranking, to be released later this month. The rankings are determined by electrical design revenue. Commonwealth's electrical design revenue for 2014 was \$33.5 million.

“Our success is ultimately about relationships – how we build them with integrity, partnership, and entrepreneurship and how we sustain them with quality, leadership, and stewardship,” said Commonwealth President, Dennis DeCosta, “Those guiding principles are our commitment to the electric power industry as we work together to solve tomorrow's energy challenges.”

Headquartered in Jackson, Michigan, Commonwealth Associates Inc. consistently delivers innovative engineering expertise to the nation's top utilities, government, industrial leaders, and some of the most prestigious academic research and health care institutions in the world. Its engineers, environmental experts, right of way professionals, and proven program managers deliver successful substation, transmission and distribution line, and power generation projects from offices coast-to-coast.
